Therabloat®

(poloxalene)

Drench Concentrate

For treatment of legume (alfalfa, clover) bloat in cattle

For veterinary use only

2 fl oz (59.1 mL)

Approved by FDA under NADA # 039-729

zoetis

Each fl oz (approx. 30 mL) contains 25 grams of poloxalene.

Indications: Therabloat Drench Concentrate will relieve legume bloat in cattle within minutes when used as directed. For best results administer at the earliest sign of bloat. If bloat has progressed in its severity to the degree that the animal is down, other means of treatment also are recommended (rumenotomy-rumen puncture). For oral use only—not for injection. May be used in lactating animals.

Dosage: For animals up to 500 lb, use 1 fl oz of Drench Concentrate. For animals over 500 lb, use 2 fl oz of Drench Concentrate.

Directions for Preparing Drench: Add the proper amount of concentrate to 1 pint of water. Mix well and administer using a drenching bottle. If a stomach tube is to be used, add concentrate to 1 gallon of water.

Caution: Keep out of reach of children.

Store at 20° to 25°C (68° to 77°F), with excursions permitted between 15° and 37°C (59° and 99°F).

For Animal Use Only

Not for Human Use
