Introducing

**WITNESS® HW HEARTWORM ANTIGEN TEST KIT**

WITNESS® HW test kits provide immediate results so your clients can rest easy

- No time lost waiting to snap
- Room temperature storage
- HW antigen testing for dogs and cats

Experience the demonstrated accuracy and affordability of WITNESS® HW test kits along with Pfizer Animal Health service and support.

Pfizer Animal Health is introducing the WITNESS® portfolio of demonstrated and effective diagnostic solutions, furthering our commitment of supporting the core areas of animal health: prevention, treatment, and diagnosis. Pfizer Animal Health is dedicated to transforming the care of animals—both companion and livestock species—for a healthier world.

Simply a smart choice for point-of-care diagnostic solutions – so your clients can rest easy.
WITNESS® HW
HEARTWORM ANTIGEN TEST KIT

WITNESS® HW is a convenient, easy-to-use, in-house test that detects the presence of adult female *Dirofilaria immitis* antigen associated with heartworm disease in dogs and cats.

**NO REFRIGERATION**  WITNESS® HW has a 12-month shelf life at room temperature (versus only 90 days for a leading competitor’s canine test).

**NO SNAPPING**  RIM™ (Rapid ImmunoMigration) technology allows for a one-step process, as opposed to the ELISA method. So unlike other in-house tests, you don’t waste time waiting to snap. Plus, you only need one drop of sample (anticoagulated whole blood, plasma, or serum).

**RAPID RESULTS**  With accurate results in 10 minutes or less, you can give your clients the immediate test results they want and peace of mind about their pets.

**EASY TO INTERPRET**  You get simple-to-understand results, with no complex interpretation needed:

- One line on the right = negative
- Two lines = positive

**WHAT COULD BE SIMPLER?**

1. Apply 1 drop of anticoagulated whole blood, plasma or serum
2. Add 2 Drops of Buffer
3. Wait 10 Minutes

**BACKED BY PFIZER ANIMAL HEALTH SERVICE AND SUPPORT**

- Same level of customer support you’re accustomed to receiving
- Available in 10- and 25-test kits

**INTRIGUED?**
