

ELECTRO R

KEY POINTS

- Convenient and economical way to provide supplementary electrolytes, trace minerals, and vitamins during periods of stress and extreme conditions
- Pre-measured packet for error-free usage
- Easily used in water or feed
- Balanced electrolyte containing sodium bicarbonate

DIRECTIONS:

For Use In Drinking Water: Administer to supply essential electrolytes and vitamins. 1 ounce treats 20 gallons of water. Mix the contents of 1 pack (12.5 oz) in 256 US gallons of water or 1 pack per 2 gallons stock and meter at 1 oz per gallon of drinking water.

For Use In Feed: When using Electro R in feed, use as a replacement for salt. Mix thoroughly in feed and substitute for salt at the following rates:

Percent of Electrolytes	Amount of Electrolytes/ 1000 lbs Feed
0.5 %	5 lbs
1.0 %.....	10 lbs
1.5 %.....	15 lbs
2.0 %.....	20 lbs

Store in a cool, dry place.
