

VITAMIN E

KEY POINTS

- Highly concentrated for economical use
- Disperses rapidly, even in cold water
- Stable source of vitamin E activity

DIRECTIONS:

Water dispersible vitamin E for use in animal drinking water. When used at a level of 3 oz per gallon of stock solution, one gallon of stock solution medicates 128 gallons of drinking water, supplying 266 IU of vitamin E in each gallon. This bottle will medicate 1,364 gallons of drinking water when used at the level of 266 IU vitamin E/gallon.

Mix fresh solutions daily.

Store in a cool, dry place.

Ingredients: Vitamin E (dl-alpha-tocopheryl acetate), polysorbate 80 and n-propyl alcohol; may also contain potassium sorbate or polyethylene glycol 400 monooleate.

A supplementary nutrition for hogs, chickens, turkeys, calves, and beef cattle.

FOR ORAL ANIMAL USE ONLY

NOT FOR HUMAN USE

KEEP OUT OF REACH OF CHILDREN
