Description & Indications

AUREO S-P 250® is a Type B Medicated Feed indicated for a wide range of enteric and respiratory diseases and contains 10 grams of Aureomycin® chlortetracycline, 10 grams of sulfamethazine and 5 grams of penicillin activity per pound of premix.

AUREO S-P 250 feed medication is indicated for:

• Treatment of bacterial swine enteritis; Salmonella choleraesuis and vibronic dysentery
• Reduced incidence of cervical abscesses caused by Group E streptococci
• Aids in the maintenance of weight gain in the presence of atrophic rhinitis
• Growth promotion and increased feed efficiency in pigs weighing up to 75 lbs.
• Prevention of disease in times of stress

Advantages

• Established product with over 50 years of safe and effective use
• Single granular formulation provides uniform distribution in feed and minimizes carryover potential
• Great fit in nursery programs getting pigs off to a fast, healthy start and sets the stage for a profitable finish
• Controls swine salmonellosis

FDA Status

AUREO S-P 250 is a Category II drug and does not require a feedmill license for manufacture of medicated feeds. No veterinary feed directive (VFD) is required.

Packaging

AUREO S-P 250 is packaged in a 50-pound, multiwall paper bag with protective barrier ply. Store in a protected location, avoid excessive heat and keep package closed to avoid contamination.

Precautions

Expiration period is 24 months from the date of manufacture. The package indicates expiration date. Withdraw 15 days prior to slaughter. Use only as directed. For use in the manufacture of swine feeds.
### Aureomycin® chlortetracycline, Sulfamethazine, Penicillin

#### Active drug ingredients
- **Aureo S-P 250 – Type B Medicated Feed**
  - Chlortetracycline calcium complex equivalent to
  - Chlortetracycline HCl ........................................... 10 g/lb
  - Sulfamethazine ........................................... 2.2% (10 g/lb)
  - Penicillin (from procaine penicillin) ................. 5 g/lb

#### Ingredients
- Roughage products, calcium carbonate, calcium sulfate and dried *Streptomyces aureofaciens* fermentation product

#### Indications
For reduction of the incidence of cervical abscesses; treatment of bacterial swine enteritis (salmonellosis or necrotic enteritis caused by *Salmonella choleraesuis* and vibronic dysentery); prevention of these diseases during times of stress; maintenance of weight gains in the presence of atrophic rhinitis; growth promotion and increased feed efficiency in swine weighing up to 75 lbs.

#### For use in the manufacture of swine feeds.
- **Mixing directions**
  - Use 10 lb (4.54 kg) Aureo S-P 250 per 1 ton (907.2 kg) of final feed.
  - Make a preblend of 10 lb of Aureo S-P 250 with part (15-20 lb) of the feed ingredients. Mix thoroughly with the remainder of the ingredients to give a final concentration of 100 g chlortetracycline, 100 g sulfamethazine and 50 g penicillin per ton of feed.

#### Warning
Withdraw 15 days prior to slaughter
