INDICATIONS AND DIRECTIONS FOR USE (cont’d)
Chlortetracycline hydrochloride - 102.4 g per packet (64 g/lb)

GENERAL INFORMATION

Net Wt  25.6 oz (725.7 g)

Use as the sole source of chlortetracycline. Prepare fresh solutions daily. Mix until dissolved. 1000 mg/gallon (5 packets per 512 gallons, this is equivalent to 2 teaspoons of powder per 5 gallons of water), administer at the indicated rates in the total water consumed over a full, 24-hour period. Administer for 7 to 14 days.

For Animal Use in Drinking Water
Chlortetracycline hydrochloride 64 g per pound

This 25.6 oz packet contains 102.4 g chlortetracycline HCI and will make the resulting concentrations:
1024 gallons containing 100 mg chlortetracycline HCI per gallon
512 gallons containing 200 mg chlortetracyline HCI per gallon
256 gallons containing 400 mg chlortetracyline HCI per gallon
102.4 gallons containing 1000 mg chlortetracyline HCI per gallon

Each teaspoon of Aureomycin® powder contains 500 mg of chlortetracyline HCl

Store at controlled room temperature, 25ºC (77ºF); excursions permitted to 15º to 30ºC (59º to 86ºF).

Stability loss may reduce effectiveness of the product. Do not administer in milk or milk replacers. When feeding milk or milk replacers, administration one hour before or two hours after feeding is recommended.

Residue Warning: Do not administer in chickens, growing turkeys, swine and cattle within 24 hours of slaughter. Do not use in calves to be processed for veal.

Do not use in lactating dairy cattle and laying chickens. A withdrawal period has not been established for this product in pre-ruminating calves.

Do not administer to poultry, dogs, cats, or any food-producing animal. Do not use in calves to be processed for veal.

Additional Info: Colors:
Use a protective clothing, breathing apparatus, and self-contained breathing apparatus when handling this material.

Do not administer to poultry, dogs, cats, or any food-producing animal. Do not use in calves to be processed for veal.

Consult a veterinarian or a diagnostic laboratory to determine sensitivity, ID number, or any food-producing animal. Do not use in calves to be processed for veal.
