SAFETY: Field safety testing has demonstrated that this product is safe for use in horses 3 months of age or older. Efficacy of the West Nile, Eastern, Western and Venezuelan virus fractions and tetanus has not been established in foals 3 months of age.

DOSAGE AND ADMINISTRATION: Shake well. Aseptically administer a single 1-mL dose intramuscularly, followed by a single dose of West Nile-Innovator® + VEWT 3-4 weeks later. Vaccinate against rabies 1 year later, and annually after that. For routine revaccination frequency against the other diseases, or advice on revaccination in the face of stress or exposure, consult your veterinarian or the manufacturer.

CAUTION: Use entire contents when first opened. This product has not been tested in pregnant animals. Contains gentamicin, neomycin, polymyxin B, thimerosal, and formalin as preservatives. In case of anaphylactoid reaction, administer epinephrine. Do not mix with other products. In case of human exposure, contact a physician.

For veterinary use only in accordance with state and local regulations.
