

50 doses  
100 ml

# Escherichia Coli Bacterial Extract

Conditional License

Contains *E. coli* 0157 SRP®  
(Siderophore Receptors  
and Porins)

**INDICATIONS:** For use in healthy cattle 5 months of age or older to reduce prevalence of the *E. coli* 0157 carrier state, and for reduction in the amount of *E. coli* 0157 shed in feces to minimize *E. coli* 0157 exposure and infection of herd-mates.

**DIRECTIONS:** Shake well before use. Administer 2 ml (1 dose) subcutaneously. Revaccinate in 2-4 weeks and again at least 6 weeks after the initial dose to complete the initial vaccination program. Revaccinate annually. Use entire contents once opened.

**CAUTIONS:** Store at 35° to 45°F (2° to 7°C). DO NOT FREEZE. Transient swelling at the injection site is commonly observed. Do not vaccinate within 60 days of slaughter. In case of allergic response, administer flunixin meglumine and/or epinephrine. Contains emulsified adjuvant, in case of self-injection seek immediate medical attention.

The product license is conditional. Efficacy and potency test studies in progress.
