Each EAZI-BREED® CIDR Cattle Insert contains 1.38 grams of progesterone in molded silicone over a flexible nylon spine. Attached to each EAZI-BREED CIDR Cattle Insert is a polyester tail.

**Uses:**
- **Replacement Beef Cattle:** Advancement of first pubertal estrus in replacement beef heifers.
- **Lactating Dairy Cows:**
  - For synchronization of estrus in lactating dairy cows with low concentration of progesterone in two blood or milk samples collected at a 7 to 14 day interval, such as samples collected on Day 35 and 42 post calving.
  - Cows diagnosed twice without a corpus luteum on either ovary via ultrasonography at a 7 to 14 day interval, such as on Day 35 and Day 42 post calving.
  - Cows not observed in estrus since calving.

**DRUG FACTS**
- **Active ingredient:** Progesterone, 1.38 grams per EAZI-BREED CIDR Cattle Insert
- **Package insert:** Available upon request from the manufacturer.

**WARNINGs:**
- **Suppliers:** Do not administer to pregnant animals.
- **Veterinarians:** Use only as directed.
- **Owners and Users:** Use only for replacement beef cattle.

**Advisory:**
- Use the EAZI-BREED CIDR Cattle Insert for 7 days (for example, if administered on a Monday remove on the following Monday).

**Packaging/Storage:**
- Store EAZI-BREED CIDR Cattle Inserts in a plastic bag or other sealable container until they can be properly disposed in accordance with applicable local, state and Federal regulations.

**Environmental Warning:**
- Avoid contact with skin by wearing protective gloves when handling the inserts. Not for use in humans. Keep out of reach of children.

**End User Instructions:**
1. **Remove EAZI-BREED CIDR Cattle Inserts by pulling, gently but firmly, on the protruding polyester tail.**
2. **Wash the EAZI-BREED CIDR Cattle Insert Applicator in a non-irritating antiseptic solution, and then lubricate the front portion of the EAZI-BREED CIDR Cattle Insert Applicator with a veterinary obstetrical lubricant before inserting the EAZI-BREED CIDR Cattle Insert into the applicator.**
3. **Fold the wings of the EAZI-BREED CIDR Cattle Insert to make it longer and continue to advance the EAZI-BREED CIDR Cattle Insert into the applicator until it is fully seated.**
4. **Lubricate the protruding tips of the wings of the EAZI-BREED CIDR Cattle Insert with veterinary obstetrical lubricant.**
5. **Push the flexible tail end of the EAZI-BREED CIDR Cattle Insert into the EAZI-BREED CIDR Cattle Insert Applicator taking care to assure the tail is extending upward through the slot of the EAZI-BREED CIDR Cattle Insert Applicator and a gentle pressure on the handle.**
6. **Fold the wings of the EAZI-BREED CIDR Cattle Insert to make it longer and continue to advance the EAZI-BREED CIDR Cattle Insert into the applicator until it is fully seated.**
7. **Lift the tail of the animal and clear the exterior of the vulva.**
8. **Squeeze the thumb and index fingers of the hand to depress the EAZI-BREED CIDR Cattle Insert Applicator through the wall. The nose to the EAZI-BREED CIDR Cattle Insert Applicator should face upward (see Figures 1-4 below).**
9. **Fold the EAZI-BREED CIDR Cattle Insert Applicator to its sides so that the EAZI-BREED CIDR Cattle Insert Applicator slightly upwards (20-30°) by lifting the handle.**
10. **Remove EAZI-BREED CIDR Cattle Inserts by pulling gently but firmly on the protruding polyester tail.**
