DO NOT USE:
- in areas with abnormal, immature or infected genital tracts
- in areas that have never lambed
- an insert more than once
- between the time of removal and breeding. Such irritation does not affect estrous cycling ewes.

WHEN USING THIS PRODUCT:
- Use: for induction of estrus in ewes (sheep) during seasonal anestrus:
- Attach to each EAZI-BREED CIDR Sheep Insert is a nylon tail. The tail should be extended upward through the slot of the applicator and is pointed away from the handle. The tail of the insert should be visible, pointing downward from the vulva of the ewe.
- Squeeze the finger grips within the handle of the applicator slightly upwards (35 - 45° angle) by lowering the handle, and then forward, without forcing, until the applicator is fully inserted into the ewe. Only use the specially designed EAZI-BREED CIDR Sheep Insert Applicator for administration.

Insertion:
1. Avoid contact with skin by wearing protective gloves when handling inserts.
2. Only use the specially designed EAZI-BREED CIDR Sheep Insert Applicator for administration.
3. Restrain ewes appropriately prior to administration.
4. Wash the applicator in a non-irritating antiseptic solution and then apply a veterinary obstetrical lubricant to the end of the applicator.
5. Push the tail end of the EAZI-BREED CIDR Sheep Insert into the applicator taking care to ensure the tail is extending upward through the slit of the applicator and is pointed away from the handle.
6. Fold the wings of the EAZI-BREED CIDR Sheep Insert to make it longer and continue to advance the insert into the applicator until it is fully seated with only the tips of the wings protruding from the end of the applicator (see Figure 1).
7. Lubricate the protruding tips of the wings of the EAZI-BREED CIDR Sheep Insert with veterinary obstetrical lubricant.
8. Open the lips of the vulva and gently place the loaded applicator through the vulva. The tip of the applicator should be past the vulva (see Figure 2).
9. Open the lips of the vulva and gently place the loaded applicator through the vulva. The tip of the applicator should be past the vulva (see Figure 2).
10. Place the loaded applicator in the ante-sac of the ewe by pushing the applicator slightly downwards (20 - 45° angle) by reversing the handle, and then forward, without forcing, until the applicator is fully inserted or resistance is felt (see Figure 3).
11. Squeeze the fingers with the handle of the applicator to deposit (20 - 45° angle) in the anterior vagina (see Figure 4) and then pull the applicator backwards to remove it from the vagina.
12. With the EAZI-BREED CIDR Sheep Insert correctly placed, with the wings open in the anterior portion of the vagina, the tail of the insert should be visible, pointing downward from the vulva of the ewe.

Removal:
1. Remove EAZI-BREED CIDR Sheep Inserts by pulling, gently but firmly, on the protruding nylon tail.
2. EAZI-BREED CIDR Sheep Inserts may remain in the vagina, therefore, if the nylon tail of the insert is not visible on the day of removal, check the vagina to determine if an insert is present. Used (removed) EAZI-BREED CIDR Sheep Inserts must be stored in a sealable container until disposed. Sealed bag/container with used EAZI-BREED CIDR Sheep Inserts must be properly disposed in accordance with applicable local, state and Federal regulations.
**EAZI-BREED™ CIDR**
(progesterone intravaginal insert) Sheep Insert

**Active Ingredients:** Progesterone, 8.3 mg per EAZI-BREED CIDR Sheep Insert

**Use:** The induction of estrus in non-bred female sheep and ewes. Endogenous estrus may occur in ewes not in regular estrous cycles outside the natural breeding season. EAZI-BREED CIDR Sheep Inserts have not been tested in estrous cycling ewes.

**Human Warning:** Avoid contact with skin by wearing protective gloves when handling inserts.

**Technical Warning:** Avoid contact with skin by wearing protective gloves when handling inserts.

**WARNINGS**

1. **Avoid contact with skin by wearing protective gloves when handling inserts.**
2. **Only use the specially designed EAZI-BREED CIDR Sheep Insert Applicator for administration.**
3. **Restrain ewes appropriately prior to administration.**
4. **Wash the applicator in a non-scratching antiseptic solution and then apply a veterinary obstetric lubricant to the end of the applicator.**
5. **Push the tail end of the EAZI-BREED CIDR Sheep Insert into the applicator taking care to ensure the tail is extending upward through the slot of the applicator and is pointed away from the handle.**
6. **Fold the wings of the EAZI-BREED CIDR Sheep Insert to make it longer and continue to advance the insert into the applicator until it is fully inserted with only the tips of the wings protruding from the end of the applicator (see Figure 1).**
7. **Lubricate the protruding tips of the wings of the EAZI-BREED CIDR Sheep Insert with veterinary obstetrical lubricant.**
8. **Close the exterior of the vulva with disposable tissue.**
9. **Open the tip of the vulva and gently place the loaded applicator through the vulva. The slit in the applicator should leave open Figure 2.**
10. **Once the loaded applicator is past the vulva slip the applicator slightly upward (20° – 45°) and by reversing the handle, and then forward, without forcing, until the applicator is fully inserted or resistance is felt (see Figure 3).**
11. **Squeeze the finger grips within the handle of the applicator to deposit the EAZI-BREED CIDR Sheep Insert in the anterior vagina (see Figure 4) and then pull the applicator backwards to remove it from the vagina.**

**Removal:**

1. **Remove EAZI-BREED CIDR Sheep Inserts by pulling, gently but firmly, on the protruding nylon tail.**
2. **EAZI-BREED CIDR Sheep Inserts may reverse direction within the vagina; therefore, if the nylon tail of the insert is not visible on the day of removal, check the vagina to determine if an insert is present.**
3. **Used (removed) EAZI-BREED CIDR Sheep Inserts must be stored in a sealable container until disposed. Sealed bag/container with used EAZI-BREED CIDR Sheep Inserts must be properly disposed in accordance with applicable local, state and Federal regulations.**

**INDUCTION OF ESTRUS IN EWES**

- **Sheep Insert** should be disposed after a single use.
- **Clear, cloudy, yellow or bloody mucus on the outside of EAZI-BREED CIDR Sheep Insert when removed from ewes.** The mucus may have an offensive odor. This is a result of mild irritation to the vaginal lining by the presence of the EAZI-BREED CIDR Sheep Insert, and generally clears within 1 to 3 days after removal of the EAZI-BREED CIDR Sheep Insert.
- **Sheep with an induced estrus.** Breeds of rams may vary in libido in the non-breeding season. Therefore a ewe to ram ratio up to 18:1 for ram lambs and up to 18:1 in ewes with abnormal, immature or infected genital tracts.
- **Administer one EAZI-BREED CIDR Sheep Insert per ewe for 5 days.**
- **After insert removal, use standard flock breeding procedures to breed ewes at induced estrus.**
- **Make sure to have a sufficient number of rams to adequately control anestrus is when ewes do not have regular estrous cycles outside the natural breeding season.**
DO NOT USE
- in areas with abnormal, immature or infected genital tracts
- in areas where there is overt rectal prolapse
- in areas of severe infestations of external parasites
- in ewes that have never lambed
- in ewes with abnormal, immature or infected genital tracts

WHEN USING THIS PRODUCT
- in ewes that require treatment the onset of estrus generally occurs within 1 to 3 days after removal of the EAZI-BREED CIDR Sheep Insert.
-used EAZI-BREED CIDR Sheep Inserts must be stored in a sealable container until disposed. Sealed bag/container with used EAZI-BREED CIDR Sheep Inserts must be properly disposed in accordance with applicable local, state and Federal regulations.

You may notice:
- Sheep Insert when removed from ewes. The mucus may have an offensive odor. This is a result of mild irritation to the vaginal lining by the presence of the EAZI-BREED CIDR Sheep Insert, and generally clears between the time of removal and breeding. Such irritation does not affect fertility.

Insert:
1. Avoid contact with skin by wearing protective gloves when handling inserts.
2. Only use the specially designed EAZI-BREED CIDR Sheep Insert Applicator for administration.
3. Restrain ewes appropriately prior to administration.
4. Wash the applicator in a non-irritating antiseptic solution, rinse and dry thoroughly with a cloth before reuse.

Directions:
1. Hold the applicator slightly upwards (35 - 45° angle) by lowering the handle, and then forward, without forcing, until the applicator is fully inserted into the vagina until the applicator is seated.
2. Lubricate the protruding tips of the wings of the EAZI-BREED CIDR Sheep Insert with a non-irritating antiseptic solution, and then apply a veterinary obstetrical lubricant to the end of the applicator.
3. Lift the tail end of the EAZI-BREED CIDR Sheep Insert into the applicator taking care to ensure the tail is extending upward through the slot of the applicator and is pointed away from the handle.
4. Fold the wings of the EAZI-BREED CIDR Sheep Insert to make it longer and continue to advance the insert into the applicator until it is fully seated with only the tips of the wings protruding from the end of the applicator (see Figure 1).
5. Open the lips of the vulva and gently place the loaded applicator through the vulva. The slot in the applicator should face down (see Figure 2).
6. With the EAZI-BREED CIDR Sheep Insert correctly placed, remove it from the vagina.

Other Information:
- Store at controlled room temperature (20° to 30° C; 68° to 86° F).
