

For vaccination of healthy pigs 3 weeks of age or older as an aid in preventing viremia, lymphoid depletion, and colonization of lymphoid tissue caused by porcine circovirus type 2; and as an aid in reducing PCV2 virus shedding. A 23-week duration of immunity has been demonstrated.

Directions: Shake well. Aseptically administer a single 2-mL dose intramuscularly.

Fostera PCV with MetaStim may also be given as two 1-mL doses administered 2 weeks apart.

For Veterinary Use Only
