**BROILER CHICKENS:** Directions for use

**DOSAGE AND ADMINISTRATION**

**Dosage:** Administer at a dose rate of 64 mg of lincomycin per gallon of drinking water.

**Treatment Period:** Start medication as soon as the diagnosis of necrotic enteritis is determined. If improvement is not noted within 24 to 48 hours, consult a licensed veterinarian or veterinary diagnostic laboratory to determine diagnosis. The drug should be administered for 7 consecutive days.

**Administration:** This packet will medicate 256 gallons of drinking water providing 250 mg/gallon. A dose of 3.8 mg lincomycin per lb of body weight may be maintained by medicating the drinking water at a concentration of 250 mg per gallon of drinking water when pigs are consuming 1.5 gallons per 100 lbs of body weight per day. Under these circumstances the concentration of lincomycin required in medicated water may be adjusted to compensate for variations in age and weight of animals, the nature and severity of disease symptoms, environmental temperature and humidity, each of which affects water consumption. For use in automatic water proportioners, prepare the stock solution by dissolving 1 packet in 2 gallons of water, then adjust the proportioner to deliver 1 oz of stock solution per gallon of drinking water.

**RESIDUE WARNINGS:**

No drug withdrawal period is required before slaughter of swine receiving Lincomycin Hydrochloride Soluble Powder at the approved level of 250 mg per gallon of drinking water, nor before slaughter of birds receiving Lincomycin Hydrochloride Soluble Powder at the approved level of 64 mg per gallon of drinking water.

**INDICATIONS AND USAGE:**

**Swine:** Lincomycin Hydrochloride Soluble Powder is indicated for the treatment of swine dysentery (bloody scours).

**Broiler Chickens:** Lincomycin Hydrochloride Soluble Powder is indicated for the control of necrotic enteritis caused by Clostridium perfringens susceptible to lincomycin.

**INDICATIONS AND USAGE:**

**Swine:** Lincomycin Hydrochloride Soluble Powder is indicated for the treatment of swine dysentery (bloody scours).

**Broiler Chickens:** Lincomycin Hydrochloride Soluble Powder is indicated for the control of necrotic enteritis caused by *Clostridium perfringens* susceptible to lincomycin.

**Antibacterial**

This packet contains as an active ingredient: Lincomycin HCl, equivalent to 64 g lincomycin.

**Proper Storage:** Store between 20˚C - 25˚C (68˚F - 77˚F) with excursions permitted between 15˚C - 40˚C (59˚F - 104˚F). See back for instructions.

**For Oral Use in Swine and Broiler Chickens Only**

**Keep Out of Reach of Children**

**Net Weight:** 160 grams (5.64 oz)

**Resource:** ANADA 200-189, Approved by FDA 13898900

**Residue warnings:** No drug withdrawal period is required before slaughter of swine receiving Lincomycin Hydrochloride Soluble Powder at the approved level of 250 mg per gallon of drinking water, nor before slaughter of birds receiving Lincomycin Hydrochloride Soluble Powder at the approved level of 64 mg per gallon of drinking water.

**Resident Drug (California):** Use only as directed. Not for Human Use.

**ANADA 200-189, Approved by FDA 13898900**
