Neo-Predef® with Tetracaine Powder
(neomycin sulfate, isoflupredone acetate, and tetracaine hydrochloride topical powder)

For Use in Animals Only

Topical anesthetic. For reduction of pain and inflammatory response where pain is a prominent factor.

Advantages of Neo-Predef® with Tetracaine Powder:
1. Immediate relief of pain and inflammatory response.
2. Reduced incidence of adhesion formation.
4. Prompt relief of symptoms.
5. Ease of application.
6. Adherent to moist surfaces.

Indications:
- For the treatment of certain ear and skin conditions occurring in dogs, cats, and horses.

Precautions:
- Before instilling any medication into the ear, examine the external ear canal thoroughly to be certain the tympanic membrane is intact.
- Allergic response has been observed in some dogs and cats.

Warnings:
- Incomplete response or exacerbation of corticosteroid-responsive lesions may be due to the presence of non-susceptible or protease resistant organisms, or to prolonged use of antibiotic-containing products.
- Transient inhibition of local immune response may result in increased sensitivity to fungi, yeast, and viral organisms, particularly Monilia.
- Tetracaine hydrochloride has been shown to be effective in the management of otic infections, and is commonly prescribed for the treatment of otic infections including staphylococci, streptococci, and other bacteria.

HOW SUPPLIED:
Neo-Predef® with Tetracaine Powder is available in 15 gram plastic insufflator bottles.

For Use in Animals Only

Applied topically, it has been used successfully in the treatment of acute otitis externa in dogs, acute mastoiditis and interdigital dermatitis in the dog, and as a dusting powder to promote rapid epithelialization of wounds, lacerations, and abrasions in the horse, cat, and dog.

WARNINGS
Not for human use. Do not use in horses intended for human consumption.

Clinical and experimental data have demonstrated that corticosteroids administered orally or by injection to animals may induce the first stage of parturition if used during the last trimester of pregnancy and may precipitate premature parturition followed by dystocia, fetal death, retained placenta and metritis.

Additionally, corticosteroids administered to dogs, rabbits, and rodents during pregnancy have resulted in cleft palate in offspring. Corticosteroids administered to dogs during pregnancy have also resulted in other congenital anomalies, including deformed forelegs, phocomelia, and anasarca.

PRECAUTIONS
Before instilling any medication into the ear, examine the external ear canal thoroughly to be certain the tympanic membrane is intact. Allergic responses have been observed in some dogs and cats.

WARNINGS
- Incomplete response or exacerbation of corticosteroid-responsive lesions may be due to the presence of non-susceptible or protease-resistant organisms, or to prolonged use of antibiotic-containing products.
- Transient inhibition of local immune response may result in increased sensitivity to fungi, yeast, and viral organisms, particularly Monilia.
- Tetracaine hydrochloride has been shown to be effective in the management of otic infections, and is commonly prescribed for the treatment of otic infections including staphylococci, streptococci, and other bacteria.

HOW SUPPLIED:
- Neo-Predef® with Tetracaine Powder is available in 15 gram plastic insufflator bottles.
- Because of the hygroscopic properties of neomycin sulfate, this bottle should be stored in a dry place.

Storage:
- Store in a dry place at controlled room temperature 20° to 25°C (68° to 77°F).
- Approved by FDA under NADA # 015-433
- Distributed by: Zoetis Inc.
- Kalamosn, MI 49007

Incomplete response or exacerbation of corticosteroid-responsive lesions may be due to the presence of non-susceptible or protease-resistant organisms, or to prolonged use of antibiotic-containing products.

APPLICATION
- After cleansing the affected area, NEO-PREDEF with Tetracaine Powder is applied by compressing the sides of the container with short, sharp squeezes. In most instances, a single daily application will be sufficient; however, it may be applied one to three times daily, as required.
