VANGUARD®

CIV H3N2 Injectable

This product has been shown to be effective for the vaccination of healthy dogs 8 weeks of age or older against canine influenza (H3N2) virus infection. This product contains canine influenza virus A/Illinois/12191/2015. Duration of immunity has not been established. For more information regarding efficacy and safety data, go to productdata.aphis.usda.gov.

Directions: Shake well. Aseptically administer 1 mL subcutaneously. Healthy dogs should receive 2 doses administered 3 weeks apart. Historically, annual revaccination with this product was recommended. The need for annual booster vaccinations has not been established for this product; consultation with a veterinarian or the manufacturer is recommended.

Precautions: Store at 2°-8°C. Prolonged exposure to higher temperatures may adversely affect potency. Do not freeze. Sterilized syringes and needles should be used to administer this vaccine. Contains gentamicin as preservative. This product has not been tested in pregnant animals. In case of anaphylactoid reaction, administer epinephrine. Do not mix with other products. In case of human exposure, contact a physician.

Technical inquiries should be directed to Zoetis Inc. Veterinary Services, (888) 963-8471.
