AlphaTrak®3

Accurate blood glucose monitoring for optimal care[1,3]

AlphaTrak 3 makes testing and monitoring blood glucose easier for everyone.

AlphaTrak 3 is specifically calibrated for dogs, cats, and horses

Humans, dogs, cats, and horses each have differences in the distribution of glucose in plasma and red blood cells.

Using a human meter in a dog, cat or horse can lead to an underestimation of blood glucose concentrations and inaccurate readings.[2]

Bluetooth®

Access accurate results with an extended blood glucose testing range[1]

AlphaTrak 3 has a testing range of 20-750 mg/dL to allow for more pinpointed results for cats, dogs, and horses.

zoetis™

Testing made simple

Easily monitor blood glucose levels of dogs, cats or horses in the comfort of your own home, clinic or farm.

Auto on

Test strips automatically turn the meter on and off for convenient testing

Small sample size

Only 0.3 uL of blood needed

Quick testing

No wait time, results in seconds

Saved automatically to app

Digital data reduces the risk of human error or missed results, and makes it easy to trend and share

Efficient patient tracking

Save time at your practice with enhanced digital results and tracking support. Connecting with client data allows for improved treatment and greater client peace of mind.

Seamless data capture

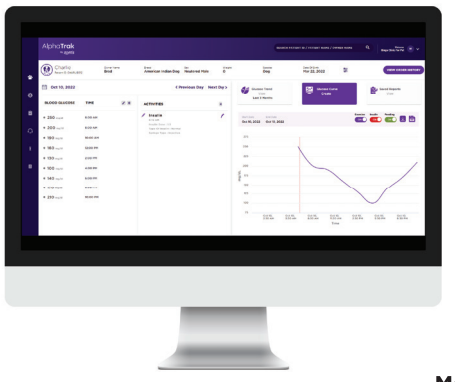
Save glucose results and build curves easily

Store results in PIMS

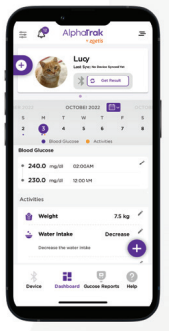
Connects to most practice management software via Wi-Fi with FUSE

Easy data transfer

Request clients to share glucose data or reports from at-home testing as needed to incorporate into the patient's medical record



Desktop web app for your practice



Mobile app for clients and practice

GET IT ON Google Play

Download on the App Store

Improve patient outcomes

See how AlphaTrak 3 can help you partner with clients to increase the quality of care for your patients.
