

PRODUCT PROFILE

MG-BAC®

DESCRIPTION

MG-Bac® is an inactivated vaccine for the immunization of healthy chickens and turkeys as an aid in the prevention of clinical signs associated with *Mycoplasma gallisepticum* infection.

COMPOSITION

Inactivated *M. gallisepticum*

FORMULATION

Water-in-oil emulsion

Option: Ready to use

TARGET SPECIES

Chickens and turkeys

INDICATIONS

MG-Bac is recommended for vaccination of healthy chickens and healthy turkeys 1 week of age or older to help protect against clinical signs associated with *M. gallisepticum* infection.

VACCINATION PROGRAM

- Inject healthy chickens or turkeys 1 to 10 weeks of age subcutaneously (in the lower neck region) using aseptic technique. For birds 10 weeks of age or older, one may vaccinate intramuscularly or subcutaneously.
- For optimum results, vaccinate twice, allowing at least 4 weeks between vaccinations. The vaccination program should be completed prior to the point of lay.
- Revaccinate birds during molt before the second laying period.
- Dosage: One dose (0.5 mL) per bird.

METHOD OF ADMINISTRATION

Subcutaneous injection (in the lower neck region), or intramuscularly (only in birds 10 weeks of age or older).

WITHHOLDING PERIOD

42 days before slaughter

PRESENTATION

1 x 500 mL (1,000 doses) bottles

STORAGE

- Store in the dark at 36°F to 45°F (2°C to 7°C).
- Do not freeze.

PRECAUTIONS

- Vaccinate only healthy birds prior to field exposure.
- If birds are vaccinated during lay, a drop in egg production may occur.
- Warm vaccine to 72°F (22°C) and shake well before using.
- Use entire contents when first opened.
- Penicillin added as a preservative.

CONTRAINDICATIONS

Do not vaccinate broilers or meat turkeys by the intramuscular route of administration.

WARNINGS

In case of accidental human injection, seek immediate medical attention, stating the vaccine is an oil-emulsion type.
