

HOW TO USE THE EAZI-BREED™ CIDR® CATTLE INSERT

FOR BEST RESULTS, FOLLOW THESE SIMPLE STEPS:

1 Wear protective gloves whenever handling the Eazi-Breed™ CIDR® Cattle Insert.

2 Prepare a container of clean water with NOLVASAN® solution. Wash the applicator with the water between uses.

3 Fit the body of the insert into the applicator with the tail along the slot. The two wings will be pushed together, protruding about 1 inch above the top of the applicator.

4 Apply a generous amount of obstetrical lubricant to the tip of the insert.

5 Shift the animal's tail to one side and clean the vulva.

6 Open the lips of the vulva and insert the applicator at a slightly upward angle, moving forward over the pelvic bone until it meets resistance.

7 Make sure the tail of the Eazi-Breed CIDR is on the underside of the applicator, curling down, to ensure the tail will be hidden from curious penmates.

8 Dispense the insert from the applicator by depressing the plunger, then slowly withdraw the applicator.

9 To prevent removal by curious penmates, you may want to clip the tail of the insert so that 2 1/2" protrudes from the vulva.

10 To withdraw the insert according to label at a later time, simply give CIDR Insert a gentle but firm pull to release the insert.

11 Dispose of used inserts in a sealed plastic container in accordance with applicable local, state and federal regulations.
