Bacitracin Methylene Disalicylate
Type A Medicated Article
Antibacterial

For supplementing rations of swine, chickens, turkeys, pheasants, quail and feedlot beef cattle

Species

Bacitracin Methylene Disalicylate

Approved by FDA under NADA # 046-592

Store below 25°C (77°F), excursions permitted to 37°C (99°F).

Not for Use in Liquid Medicated Feeds.

For Use in Dry Feeds Only.

Not for human use.

Restricted Drug (California) - Use only as directed.

Grams bacitracin per ton of feed
mg/head/day

100 - 200

10 - 30

5 - 20

4 - 50

For supplementing rations of swine, chickens, turkeys, pheasants, quail and feedlot beef cattle

For increased rate of weight gain and improved feed efficiency.

CAUTION:

To control a necrotic enteritis outbreak, start medication at the first clinical

other organisms susceptible to bacitracin methylene disalicylate.

As an aid in control of necrotic enteritis caused or complicated by

Clostridium
clostridial organisms.

spp.
