Caution: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.

Sulfadimethoxine & Ormetoprim
Type A Medicated Article
Antibacterial
Anticoccidial

Indications:
- As an aid in the control of bacterial infections due to Escherichia coli, Riemerella anatipestifer (strains 2, 3 & 4) and severe challenge of Pasteurella multocida (fowl cholera).
- As an aid in the prevention of coccidiosis caused by Eimeria adenoeides, E. gallopavonis, E. mivati; Eimeria tenella, E. necatrix, E. acervulina, E. mivati, E. kofoidi and E. legonensis.
- For use in manufacturing medicated feeds only.

Use directions:
- Add 4 lbs of RofenAid 40 to one ton of feed to provide 0.08% (454 g/ton [0.050%]) sulfadimethoxine and 272.4 g/ton [0.030%] ormetoprim) concentration in feed. Medication should be started at the first signs of infection. Feed for 7 days as the sole ration.

Use directions:
- Add 2 lbs of RofenAid 40 to one ton of feed to provide 0.04% (227 g/ton [0.025%]) sulfadimethoxine and 136.2 g/ton [0.015%] ormetoprim) concentration in feed. Medication should be started at the first signs of infection. Feed for 7 days as the sole ration.

Use directions:
- Add 1/2 lb of RofenAid 40 to one ton of feed to provide 0.01% (56.75 g/ton [0.00625%]) sulfadimethoxine and 34.05 g/ton [0.00375%] ormetoprim) concentration in feed. Feed continuously as the sole ration.

Use directions:
- Add 1 lb of RofenAid 40 to one ton of feed to provide 0.02% (113.5 g/ton [0.0125%]) sulfadimethoxine and 68.1 g/ton [0.0075%] ormetoprim) concentration in feed. Feed continuously as the sole ration.

Use directions:
- Add 1/2 lb of RofenAid 40 to one ton of feed to provide 0.01% (56.75 g/ton [0.00625%]) sulfadimethoxine and 68.1 g/ton [0.0075%] ormetoprim) concentration in feed. Feed continuously as the sole ration.
