

Fewer flies in your stable in 4 to 6 weeks.

Effective feed-through fly control from SOLITUDE® IGR.

SOLITUDE® IGR (2.12% *cyromazine*) is an entirely innovative feed-through fly preventive designed to keep flies, and the disease they bring, away from your horses.

Safe, cost-effective, easy dose

A safe, cost-effective, easy dose — ½ oz. into a horse’s daily ration — it works in manure to prevent flies from developing into adults. Treat all your horses and the result is a comfortable, nearly fly-free environment.

Break the fly life cycle

Whether they inflict painful bites or are simply a nuisance, flies are capable of transmitting diseases and even affecting the weight and condition of horses in severe cases. **SOLITUDE IGR** is 99.5% effective against stable flies and 100% effective against houseflies with no effect on horses, other mammals or beneficial insects. In fact, repeated studies show up to 100% efficacy in inhibiting larvae development.

Available in the following package sizes:
6 lb. / 192 doses; 20 lb. / 640 doses

Solitude[▼]IGR (2.12% cyromazine)

“It took about a month to see the results. I have found this product to be superior to anything I’ve tried for fly control in the past. In fact, SOLITUDE IGR has exceeded my expectations for a fly control product.”

— John Peterson, DVM
Peterson & Smith Equine Hospital
Ocala, Fla.

“Nothing else worked like this. SOLITUDE IGR is actually saving us money. We were thrilled. A great product that actually does what it says!”

— Adrian and Shelley Scott-Jones
Ocala, Fla.

“I can tell you it’s cut our fly population by more than 75%.”

— Nikki James, Certified Vet Tech
Boring, Ore.
