SYNOVEX ONE Feedlot (trenbolone and estradiol extended release implant) is designed to be used exclusively with a Synovex SX10 Gun. Each implant consists of 8 pellets. Ten implants are provided in each cartridge.

INDICATIONS FOR USE: For increased rate of weight gain and improved feed efficiency for up to 200 days in steers and heifers fed in confinement for slaughter. For increased rate of weight gain and improved feed efficiency for up to 200 days in steers and heifers fed in confinement for slaughter.

DOSAGE: One implant (8 pellets), containing 200 mg of trenbolone acetate and 28 mg of estradiol benzoate, is administered to each steer or heifer by subcutaneous implantation in the middle one-third of the ear. Implant complete contents of one cartridge per steer or heifer. Approved implantation technique is fully described in the fold-out carton section.

NOTE: Never sacrifice careful, clean technique for speed of implantation.

STORAGE: Store unpacked product at controlled room temperature (20°-25°C, 68°-77°F) with excursions between 15°-30°C (59°-86°F). Avoid exposure to heat and humidity. One product is the expiration date on the label. See top of pouch for lot and expiration date.

TIME/DATE: 2/19/15   9:26 AM

NOT FOR USE IN HUMANS.

ANIMAL SAFETY WARNINGS: Bulb, vaginal and rectal prolapse, bulbar oedema, ventral edema and elevated rectal temperature are occasional findings in steers and heifers fed in confinement for slaughter. Bulls, vaginal and rectal tailheads have occasionally been reported in heifers. Implant pellets in ear only. Any other location is a violation of Federal law. Do not attempt to salvage of implanted site for human or animal use in calves to be processed for veal.

WARNING: SYNOVEX ONE Feedlot implants are provided in NADA 141-348, Approved by FDA. A withdrawal period has not been established when used according to labeling. No withdrawal period is required when used according to labeling. Use product before the expiration date on the label. Once the pouch is opened, unused product may be stored in an airtight, insulated, vented container at refrigerator temperatures (2°-8°C, 36°-47°F) for a period of 1 month. Once the pouch is opened, unused product may be stored in an airtight, insulated, vented container at refrigerator temperatures (2°-8°C, 36°-47°F) for a period of 1 month.

DISPOSAL: SYNOVEX ONE Feedlot waste materials should be disposed of in accordance with prescribed Federal, State, and Local guidelines.
