SYNOVEX ONE Grass is a growth promoting implant containing 150 mg of trenbolone acetate and 21 mg of estradiol benzoate, designed to be used exclusively with a Synovex SX10 implantation device. Each ten-dose cartridge of SYNOVEX ONE Grass is designed to be used exclusively with a Synovex SX10 implantation device.

**INDICATIONS FOR USE:** This implant is recommended for treatment of pasture steers and heifers (slaughter, stocker and feeder) up to 200 days in pasture steers and heifers (slaughter, stocker and feeder). For increased rate of weight gain in feedlot steers and heifers.

**DOSAGE:** One implant (6 pellets) is designed to be used exclusively with a Synovex SX10 implantation device. Ten implants are administered to each steer or heifer by subcutaneous administration in the middle one-third of the ear.

**DIRECTIONS:** Implant complete contents of one cartridge per steer or heifer. Approved implantation technique is fully described in the fold-out carton section.

**NOTES:**
- Always follow good aseptic and aseptic technique. Never sacrifice careful, clean technique for speed of implantation.
- Do not use in veal calves. Effectiveness and animal safety for this product in pre-ruminating calves have not been established.

**ANIMAL SAFETY WARNING:** Prolonged exposure to high levels of estradiol may result in adverse effects such as confirmed feminization or estrus-like behavior in bulls and steers.

**STORAGE:** Store unopened product at controlled room temperature 20°-25°C (68°-77°F) with excursions between 15°-30°C (59°-86°F) for up to one month under refrigerated conditions 2°-8°C (36°-47°F). Avoid excessive heat and humidity.

**DISPOSAL:** SYNOVEX ONE Grass waste materials should be disposed of according to prescribed Federal, State, and Local guidelines.

**NOT FOR USE IN HUMANS. FOR ANIMAL USE ONLY.**
