

**BEFORE TREATMENT**

**AFTER CYTOPOINT**

**DUBLIN, MALE, AGE 9 YEARS, NEWFOUNDLAND**

Veterinarian: Dr Dan Hebert, Duxbury Animal Hospital, Duxbury, MA

## **CYTOPOINT® offers long-lasting relief that removes the burden of daily dosing treatments<sup>1</sup>**

### **Dublin's owner has a busy lifestyle that makes daily treatment schedules impractical**

Dublin had been suffering for years with rashes on his stomach and ear infections. His constant discomfort led him to compulsively gnaw at his skin.

#### **Treatment decision**

Dr Hebert diagnosed the cause of Dublin's persistent itch as atopic dermatitis and gave him an injection of CYTOPOINT. He also prescribed CONVENIA® (cefovecin sodium) for the pyoderma and a long-acting treatment for the otitis.

#### **CYTOPOINT treatment result**

Dublin made a full recovery and continues to do well. Dublin and his owner can now enjoy life free from the distraction of canine atopic dermatitis and the inconvenience of daily medication administration.

**“I WATCH HIM NOW, AND HE IS BACK TO BEING THAT FUN-LOVING DOG...I KNOW THAT HE'S GOING TO BE OK. AND THAT PEACE OF MIND IS LITERALLY PRICELESS.”**

– SherryAnn Quindley, Dublin's owner

**CYTOPOINT Indications:** CYTOPOINT has been shown to be effective for the treatment of dogs against allergic dermatitis and atopic dermatitis.

**CONVENIA Indications:** CONVENIA is indicated for the treatment of skin infections (secondary superficial pyoderma, abscesses, and wounds) in dogs caused by susceptible strains of *Staphylococcus intermedius* and *Streptococcus canis* (Group G).

**CONVENIA Important Safety Information:** People with known hypersensitivity to penicillin or cephalosporins should avoid exposure to CONVENIA. Do not use in dogs or cats with a history of allergic reactions to penicillins or cephalosporins. Side effects for both dogs and cats include vomiting, diarrhea, decreased appetite/anorexia and lethargy.
