

Long-lasting relief from canine atopic dermatitis is now a breeze!

CYTOPOINT.

How to dose

- CYTOPOINT® is available in single-use 1-mL vials in four concentrations: **10, 20, 30 or 40 mg/vial**
- Administer CYTOPOINT subcutaneously at a minimum dose of 2 mg/kg body weight. For convenience, the dosing table below may be used as a guideline
- Repeat administration every 4 to 8 weeks as needed in individual patients

	DOG BODY WEIGHT		VIALS NEEDED				TOTAL VIALS
	Pounds	(Kilograms)	10 mg	20 mg	30 mg	40 mg	
DOGS <5 lb (<2.3 kg) 0.09 mL/lb (0.2 mL/kg) drawn from ONE 10-mg vial.	<5	(<2.3)	<1				<1
DOGS 5-40 lb (2.3-18.1 kg) Draw full volume from ONE 1-mL vial as indicated.	5.0 - 10	(2.3 - 4.5)	1				1
	10.1 - 20	(4.6 - 9.1)		1			1
	20.1 - 30	(9.2 - 13.6)			1		1
	30.1 - 40	(13.7 - 18.1)				1	1
DOGS >40 lb (>18.1 kg) Requires full volume of TWO OR MORE 1-mL vials as indicated. Draw the entire dose (or volume) from each vial into one syringe and administer as a single injection.	40.1 - 50	(18.2 - 22.7)	1			1	2
	50.1 - 60	(22.8 - 27.2)		1		1	2
	60.1 - 70	(27.3 - 31.7)			1	1	2
	70.1 - 80	(31.8 - 36.3)				2	2
	80.1 - 90	(36.4 - 40.8)	1			2	3
	90.1 - 100	(40.9 - 45.4)		1		2	3
	100.1 - 110	(45.5 - 49.9)			1	2	3
	110.1 - 120	(50.0 - 54.4)				3	3
	120.1 - 130	(54.5 - 59.0)	1			3	4
	130.1 - 140	(59.1 - 63.5)		1		3	4
	140.1 - 150	(63.6 - 68.0)			1	3	4
	150.1 - 160	(68.1 - 72.6)				4	4
160.1 - 170	(72.7 - 77.1)	1			4	5	
170.1 - 180	(77.2 - 81.6)		1		4	5	
180.1 - 190	(81.7 - 86.2)			1	4	5	
190.1 - 200	(86.3 - 90.7)				5	5	

Store vials upright in original packaging, at 2°-8°C/ 36°-47°F. Do not freeze

– Prolonged exposure to higher temperature and/or direct sunlight may adversely affect potency

CYTOPOINT contains no preservatives and vials are single-use only

Vials should be discarded after puncture

Indication

CYTOPOINT aids in the reduction of clinical signs associated with atopic dermatitis in dogs.
