Chlortetracycline Psittacine Feed – AUREO®
Type C Medicated Complete Feed
(chlortetracycline Type C medicated feed)

Caution: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.

For treatment of psittacine birds (parrots, macaws, cockatoos) suspected or known to be infected with psittacosis caused by *Chlamydia psittaci* sensitive to chlortetracycline.

**Active Drug Ingredient** Chlortetracycline\(^a\)…………………………………………………10 mg/g (1.0%)

**Guaranteed Analysis**
- Crude Protein (Min) ............................................................................................ \(\_\_\_\_\_\_\_\%\)
- Crude Fat (Min) ................................................................................................. \(\_\_\_\_\_\_\%\)
- Crude Fiber (Max) .............................................................................................. \(\_\_\_\_\_\_\%\)
- Moisture (Max) ................................................................................................. \(\_\_\_\_\_\_\%\)

**Ingredients**
Ingredients as defined by AAFCO.

**Feeding Directions**
Feed continuously for 45 days. Each bird should consume an amount of medicated feed equal to one-fifth of its body weight daily. During treatment, parrots, macaws and cockatoos should be kept individually or in pairs in clean cages.

**Warning**
Psittacosis, avian chlamydiosis, or ornithosis is a reportable communicable disease, transmissible between wild and domestic birds, other animals and man. Contact appropriate public health and regulatory officials.

**Caution**
Aspergilliosis may occur following prolonged treatment.
